

Molly's Water World

Molly McIntyre

As a Year 12 student on an artistic journey, I aim to create mosaics reflecting who I am and the vibrant energy I carry.

I seek a balance between simplicity in design and the craftsmanship of mosaicing with varied techniques.

My art isn't just meant to be seen but also felt – a tactile experience that invites people to touch and explore.

I draw inspiration from the playful energy of life experiences, using bold and bright colours to craft a mosaic artwork that stands out with its unique charm. To expand my creative horizons, I immersed myself in the works of mosaic artists and diverse contemporary and master artists. I'm all about trying new techniques and materials and constantly pushing my creative limits.

My mosaics connect with my memories and evoke nostalgia, connecting to different elements of my life. With every piece, I aim to bring smiles and trigger positive experiences, taking viewers on a timeless artistic journey.

I have built skills in creating a balanced composition, utilising colour, and creatively applying varied mosaic technical skills. The finished piece is something I am proud of.
