## Biology

### Biology Workbook – 2<sup>nd</sup> Edition - SACE 1 - YEAR 11 -

Australian Curriculum – Topics 1-4 - ISBN: 978-1-925505-23-8

Authors: Alan Crierie, Dave Grieg & Simon Ruthven Pages: 487

The Essentials Stage 1 Biology Workbook was first published in 2017 and has been used by many schools and thousands of students over the years. The publisher and authors have decided to revise it in this 2nd Edition in view of changes to the SACE Subject Outline and feedback from schools and teachers.

In particular, the additional features of this second edition of this popular workbook include:

Use of QR codes to access many recommended websites or will direct the reader to videos or animations; in particular our own 'Essentials Video Animations' (EVAs) on the Essentials Education website.

An emphasis on Key Terms that are highlighted (semi-bold) throughout, listed at the end of each chapter, defined in the Glossary of Terms and now also included in the Index at the end of the workbook.

Practical activities for the 'Science Inquiry Skills' (SIS) strand for many of the chapters together with a comprehensive guide and examples of 'Deconstruction'.

Assignments for the 'Science as a Human Endeavour' (SHE) strand, together with the relevant SHE Aspect and useful guidelines for staff and students.

Suggested answers for all of the exercises at the end of each chapter and Laboratory Notes for all SIS practical activities.

A 'Test Yourself' for each Topic with 'SACE exam-style' questions, including Multiple Choice, which are keyed to the Assessment Design Criteria. Suggested Answers and Mark Schemes are also provided. Complimentary digital access.

## Chemistry

### 2023 Topics Tests for Biology, Chemistry & Physics

SASTA is excited to make available sets of Topic Tests that may be used as formative or summative Skills and Applications Tasks (SATs) in Stage 1 Biology, Chemistry and Physics. These tests are of the highest quality and feature a comprehensive range of original questions including science understanding, science inquiry skills and science as a human endeavour.

All tests are out of 50 marks and are designed to be used as formative or summative assessments.

Each test is fully editable and comes with a comprehensive set of solutions which allows educators to modify each test depending on the capabilities of their student cohort.

The tests and exams include questions covering science inquiry skills (IAE) and science as a human endeavour (KA3).

The questions are all contextual and are based on contemporary examples to show students the relevance of science in the modern world (KA1 and KA2).

The questions in the biology tests can be cut and pasted into online testing software programs to provide students with a real-time exam experience.

Each task has a range of questions that vary in difficulty and are challenging enough to differentiate students with good core knowledge from those capable of applying knowledge in context.

View information about the 2023 SASTA Stage 1 Trial Exams [here](#).

The SHE questions can be part of the tests or you can remove them and use them as stand-alone tasks to develop student knowledge, understanding and ability in responding to these questions

## Chinese

### Ni Hao 你好 (books 3 and 4)

**Intermediate level - Ni Hao 3** is the third level in the series and is designed for students who have completed Ni Hao 1 and Ni Hao 2. It is suited to high school students in grade 10 or 11.

As in the previous Ni Hao levels, Chinese characters are used extensively throughout the text and are accompanied by Pinyin, which is gradually omitted.

Ni Hao 3 teaches students more advanced sentence structures and expands on the vocabulary and language to assist them with holding more in-depth conversations on relevant topics.

This level introduces more than 500 words and phrases, and provides 151 characters to learn to write.

**Advanced Level - Ni Hao 4** is an advanced Chinese language course for senior school students. A different approach is used for this level. There are more opportunities for listening to unrehearsed text and for discussions in Chinese. Topics for this level reflect the diversity of senior students' lives: from school-based interests and activities to personal/social concerns about health, adolescence, part-time work, relationships, customs, technology and environmental issues.

There are four lessons in this book. Each lesson has three sub-topics and each sub-topic consists of six sections and three subsections.

## Creative Arts

There are no specific student texts because of the range of possible options available to students. These two texts are useful teacher resources.

### Delivering Authentic Arts Education by Judith Dinham

This market-leading text helps you develop the confidence, understanding and skills you need to teach arts, including dance, drama, media arts, music and visual arts. With a perfect balance between theory and practice, Delivering Authentic Arts Education outlines the key learning area of arts education and its importance in the curriculum. It also conveys creative activity and expression within a cultural context.

The text tells you how to recognise and build on your existing artistic abilities and teaching skills, how to encourage children's creativity and how to lead arts appreciation experiences. It also includes information on planning and assessment. New, print versions of this textbook come with bonus online study tools on the CourseMate Express platform.

### Caves to Canvas By Donald Williams, Barbara Wilson

Caves to Canvas is highly valued for its analysis of artists and artwork, from prehistoric times to the present day. Diary extracts, letters, reviews and media reports are used to introduce your students to the world of the artist, and help them to examine historical, social, political and religious influences on artwork. Extensively revised and updated, the third edition includes significant material on contemporary artists and is supported by a student CD-ROM.

### The Quick Python Book by Naomi Cedar

Manning Publications

The Quick Python Book, Third Edition, is a clear, concise introduction to Python 3, aimed at programmers new to Python. This updated edition includes all the changes in Python 3, itself a significant shift from earlier versions of Python. The book begins with basic but useful programs that teach the core features of syntax, control flow, and data structures. It then moves to larger applications involving code management, object-oriented programming, web development, and converting code from earlier versions of Python.

Naomi Cedar is chair of the Python Software Foundation. She has been learning, using, and teaching Python since 2001.
